

DJ340

High-Resolution Inkjet Printers

The DJ340 offers a robust yet simple to use interface, accompanied by a very “LOW” cost per print, making this a cost effective solution for all of your coding and marking needs.

Key Feature:

- Robust, reliable and low cost piezo-jet printer system, with minimal maintenance.
- Simple to Install and Set-up.
- User friendly message editing with a 4.3” LCD touch screen.
- 2 levels of password protection.
- 360 DPI capability using the 45 degree angled head option.
- Hands free auto-prime.
- Drains without mess.
- Automatic cleaning of print head nozzles.
- Quick change print engine.
- Umbilical print head connection for both XJ128 and XJ382.
- UV Cured options available.

Technical Details & Specification:

■ Piezo impulse printhead technology

Electrical requirement	AC 90V ~240V, 50/60 HZ
Operating temperature	5°C ~50°C (5°F - 122°F)
Vertical resolution	185 dpi (Angled head can provide 360 DPI capability with bracket and included software)
Horizontal resolution	200dpi
Printing speed	4.3" LCD touch screen Capable of storing of over 1,000 messages 30m/minute (100ft/min) at 200dpi
Message length	1.024mm (40 ins) - XJ128 512mm (20ins) - XJ382
Orientation	Horizontal and Vertical printing
Throw distance	Maximum 6.5 mm (0.25 ins)
Print height	Up to 17.5mm (0.7 ins) with a single XJ128 print head Up to 54mm (2.1 ins) with a single XJ382 print head Multi-language support
Ink usage	Available for porous, non-porous and UV curing inks
Ink supply	250ml ink box. Bulk ink supply is optional

Print capability :

- Support multi-text fonts.
- Flexibly for multi-line printing.
- Automatic real time/date and shift code functions.
- Automatic best-before date calculation.
- Automatic increment and decrementing batch counting.
- Auto repeat printing.
- Barcode printing function.
- External data connection.
- Supports 1 bit bitmap graphic files.
- Rotated text.
- Ink usage calculator inbuilt for current message.
- Options include encoder and print head swing arm mount.
